ROLL

NO. 2

microfilmed by DIVISION OF RECORDS MANAGEMENT
Department of Archives and History
929 High Street
Jackson, MS 39202

DENSITY TARGET

OPERATOR Roger Turlington AGENCY Dept. of Archives And History
Records Management Division
VOLTAGE 72.5 REDUCTION RATIO 12

DATE 10/22/92

In order to be assured of a reproducible master roll, the American National Standards Institute recommends that film density be maintained between 0.9 and 1.3.

By microfilming this target at the beginning and end of each microfilm roll, a densitometer reading can be made by the State Records Center. If any problem should arise the SRC will report and assist in correcting the problem.

Please do not write in this area -- to be used for densitometer readings.
